**Re: Recyclables Inspections**

This is to remind you of your obligations and responsibilities as a permitted waste hauler in St. Lawrence County. County solid waste and recycling laws require source separation of designated recyclables from other waste. It is in your best business interest to educate your customers. The obligation is yours to ensure that recyclables are collected separately and disposed of properly.

This is to advise you that starting in July 2015, the Development Authority of the North Country, in coordination with St. Lawrence County, will commence an increased inspection program of your waste vehicles and their loads. Vehicles will be randomly selected, the loads will be inspected and any problems identified and documented. You will be provided a written description of the findings of the inspected load. It is our intention to work with you to improve recycling. However; over time, waste collectors in violation of local solid waste and recycling laws may face escalating fines and possible revocation of their waste hauler permits.

We are prepared to work with you. If you need assistance in the preparation of educational information for your customers, please contact our office. Thank you for your cooperation and assistance in this matter.
